

MEETING MINUTES

Type of Meeting:	DRAWA kick-off meeting
Date:	07.12.2017
Location:	Great Hall of the castle Mailath, Donji Miholjac
Chaired by:	Lidija Hubalek
Duration:	10:00 - 13:00
Minutes done by:	Rade Gicić
Date of Minutes:	12.12.2017

AGENDA

	Topic
1.	Welcome speech
2.	Presenting the activities of implementation of the Hungarian part of the project
3.	Presentation of activities making trilingual tourism guide and handbook, and making trilingual mobile applications
4.	Presentation of the measurement system
5.	Presentation "Possibilities for development of nautical tourism on the Drava River from 0 rkm - 198 rkm"
6.	Questions and Answers, Discussion with Users

OPEN ISSUES

Topic	Responsible	Deadline
Which exact areas will be covered by the manual?		
Which maps will be used in the app?		
Information in the app - static or dynamic?		
Could handbook include mouth of the Mura river?		

OUTCOMES

The activities of implementation of the Hungarian part of the project

Hungarian partner will purchase low budget vessel for hydrological surveying. Collected data will then be used for creation of a digital map of Drava river which will be a base for development of the touristic mobile phone application.

The activities of implementation of the Croatian part of the project

Within the Croatian part of the project, tourism guide and mobile application will be made. They will cover both sides of Drava river, so tourists can easily find local attractions and other points of interest.

Presentation of the hydrological recording system

The Hungarian vessel for hydrological surveying will be equipped with the GPS and sonar. Software for storing and processing data will also be part of vessel's recording system.

Possibilities for development of nautical tourism on the Drava River

To ensure development of nautical tourism on the Drava River further upstream improvements of infrastructure need to be achieved. Also measures to enable safe navigation need to be implemented. Drava river is currently navigable for "big" vessels (international class IV) only to the city of Osijek, for "smaller" vessels (class III) up to rkm 54 and for recreational navigation up to Ždalica (class II - rkm 198).
